### GET /

*Health check*

**Responses**

| Status Code | Description |
|---|---|
| 200 | API is healthy |

### GET /food/search

*Search for food by name or GTIN*

**Parameters**

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| name | query | string | No | |
| gtin | query | string | No | |
| page | query | number | No | Page number |
| limit | query | number | No | Number of items per page |

**Responses**

| Status Code | Description |
|---|---|
| 200 | Search results |
| 400 | Invalid parameters |
| 404 | Food not found |
| 500 | Internal server error |

## GET /food

*Get all food items with pagination*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| page | query | number | No | Page number |
| limit | query | number | No | Number of items per page |

### Responses

| Status Code | Description |
|---|---|
| 200 | List of food items |
| 500 | Internal server error |

## GET /food/{id}

*Get food item by ID*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | integer | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 200 | Food item details |
| 400 | Invalid ID |
| 404 | Food not found |
| 500 | Internal server error |

## POST /user/sleep/start

*Start a sleep session*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Sleep session started |
| 400 | Invalid request |
| 500 | Internal server error |

**Security:**

cookieAuth

## POST /user/sleep/end

*End current sleep session*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 200 | Sleep session ended |
| 400 | No active sleep entry |

| Status Code | Description |
|---|---|
| 500 | Internal server error |

**Security:**
cookieAuth

## POST /user/sleep/new

*Create a new sleep entry manually*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Sleep entry created |
| 400 | Invalid dates |
| 500 | Internal server error |

**Security:**
cookieAuth

## GET /user/sleep

*Get all sleep entries for current user*

### Responses

| Status Code | Description |
|---|---|
| 200 | List of sleep entries |
| 500 | Internal server error |

**Security:**
cookieAuth

## GET /user/sleep/{id}

*Get a sleep entry by ID*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 200 | Sleep entry details |
| 404 | Sleep entry not found |
| 500 | Internal server error |

**Security:**
cookieAuth

## PATCH /user/sleep/{id}

*Update a sleep entry*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 200 | Sleep entry updated |
| 400 | Invalid request |
| 404 | Sleep entry not found |
| 500 | Internal server error |

**Security:**

cookieAuth

## DELETE /user/sleep/{id}

*Delete a sleep entry*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 204 | Sleep entry deleted |
| 404 | Sleep entry not found |
| 500 | Internal server error |

**Security:**

cookieAuth

## GET /user/food/{id}

*Get a user meal by ID*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 200 | Meal details |
| 404 | Meal not found |
| 500 | Internal server error |

## PATCH /user/food/{id}

*Update a user meal*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 200 | Meal updated |
| 400 | Validation failed |
| 404 | Meal not found |
| 500 | Internal server error |

## DELETE /user/food/{id}

*Delete a user meal*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 204 | Meal deleted |
| 404 | Meal not found |
| 500 | Internal server error |

## GET /user/food

*Get all user meals with pagination*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| page | query | number | No | Page number |
| limit | query | number | No | Number of items per page |

### Responses

| Status Code | Description |
|---|---|
| 200 | List of meals |
| 404 | No meals found |
| 500 | Internal server error |

## POST /user/food

*Create a new user meal*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Meal created |
| 400 | Validation failed |
| 500 | Internal server error |

## GET /user/workout/template

*Get all workout templates*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| page | query | number | No | Page number |
| limit | query | number | No | Number of items per page |

### Responses

| Status Code | Description |
|---|---|
| 200 | List of templates |
| 500 | Internal server error |

## POST /user/workout/template

*Create a workout template*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Template created |
| 400 | Validation failed |
| 500 | Internal server error |

## GET /user/workout/template/{id}

*Get a workout template by ID*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 200 | Template details |
| 404 | Template not found |
| 500 | Internal server error |

## PATCH /user/workout/template/{id}

*Update a workout template*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 200 | Template updated |
| 400 | Validation failed |
| 404 | Template not found |
| 500 | Internal server error |

## DELETE /user/workout/template/{id}

*Delete a workout template*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

### Responses

| Status Code | Description |
|---|---|
| 204 | Template deleted |
| 404 | Template not found |
| 500 | Internal server error |

## GET /user/workout

*Get all user workouts*

### Parameters

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| page | query | number | No | Page number |
| limit | query | number | No | Number of items per page |

### Responses

| Status Code | Description |
|---|---|
| 200 | List of workouts |
| 500 | Internal server error |

## POST /user/workout

*Log a new workout*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Workout logged |
| 400 | Validation failed |
| 500 | Internal server error |

## GET /user/workout/{id}

*Get a workout by ID*

**Parameters**

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

**Responses**

| Status Code | Description |
|---|---|
| 200 | Workout details |
| 404 | Workout not found |
| 500 | Internal server error |

## PATCH /user/workout/{id}

*Update a workout log*

**Parameters**

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

**Request Body**

*Content Type: application/json*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Workout updated |
| 400 | Validation failed |
| 404 | Workout not found |
| 500 | Internal server error |

## DELETE /user/workout/{id}

*Delete a workout log*

**Parameters**

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| id | path | string | Yes | |

**Responses**

| Status Code | Description |
|---|---|
| 204 | Workout deleted |
| 404 | Workout not found |
| 500 | Internal server error |

## GET /user/data/reference/activity-levels

*Get activity level reference data*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Activity levels |
| 500 | Internal server error |

## GET /user/data/reference/length-units

*Get length unit reference data*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Length units |
| 500 | Internal server error |

## GET /user/data/reference/weight-units

*Get weight unit reference data*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Weight units |
| 500 | Internal server error |

## GET /user/data/profile

*Get current user profile*

**Responses**

| Status Code | Description |
|---|---|
| 200 | User profile |
| 500 | Internal server error |

## PUT /user/data/profile

*Update current user profile*

**Request Body**

`Content Type: application/json`

**Responses**

| Status Code | Description |
|---|---|
| 200 | Profile updated |
| 400 | Validation failed |
| 500 | Internal server error |

## GET /user/data/goals

*Get user goals*

**Responses**

| Status Code | Description |
|---|---|
| 200 | User goals |
| 500 | Internal server error |

## PUT /user/data/goals

*Update user goals*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 200 | Goals updated |
| 400 | Validation failed |
| 500 | Internal server error |

## POST /user/data/log/weight

*Log body weight*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Weight logged |
| 400 | Validation failed |
| 500 | Internal server error |

## GET /user/data/log/weight/latest

*Get latest weight log*

### Responses

| Status Code | Description |
|---|---|
| 200 | Latest weight log |
| 500 | Internal server error |

## POST /user/data/log/height

*Log height*

### Request Body

*Content Type: application/json*

### Responses

| Status Code | Description |
|---|---|
| 201 | Height logged |
| 400 | Validation failed |
| 500 | Internal server error |

## GET /user

*Get current user profile*

### Responses

| Status Code | Description |
|---|---|
| 200 | User profile |
| 401 | Unauthorized |

```

```

## GET /workout/exercises

*Get list of all exercises*

**Responses**

| Status Code | Description |
|---|---|
| 200 | List of exercises |
| 500 | Internal server error |

## GET /workout/weight-options

*Get available weight units and options*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Weight options |
| 500 | Internal server error |

## GET /workout/set-styles

*Get available workout set styles (e.g., straight, superset)*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Set styles |
| 500 | Internal server error |

## GET /workout/set-types

*Get available workout set types (e.g., warm-up, working)*

**Responses**

| Status Code | Description |
|---|---|
| 200 | Set types |
| 500 | Internal server error |

## GET /logs

*Get system logs or connect to WebSocket for live logs*

**Parameters**

| Name | In | Type | Required | Description |
|---|---|---|---|---|
| dateStart | query | string | No | |
| dateEnd | query | string | No | |
| context | query | string | No | |
| level | query | string | No | |
| page | query | number | No | Page number |
| limit | query | number | No | Number of items per page |

### Responses

| Status Code | Description |
|---|---|
| 200 | List of logs or WebSocket upgrade |
| 401 | Unauthorized |
| 403 | Forbidden |
| 500 | Internal server error |
